

## Immersive Learning - Implementation Checklist

Headsets	Does each location have the correct amount of headsets? Is each headset loaded with the correct experiences?
Storage solution	Where will headsets be stored when not being used? Strivr recommends one of four storage solutions: tray, case, locker, cart.
Dedicated Immersive Learning room / area	Do learners have enough space to move their bodies while training in VR?
Hygiene plan	How will you ensure a safe and healthy learning environment? Here are best practices.
Assembly & installation	Is the VR training equipment set up in the dedicated Immersive Learning area? Do you have internet connection? Are all headsets charging?
Facilitator onboarding	Do facilitators know how to administer Immersive Learning properly and safely to their learner groups? Have they completed the experiences themselves? Are they excited to lead this initiative?
